Zac Anger

zacanger.com · zac@zacanger.com · github.com/zacanger

I'm a programmer with a history in Node, React, and DevOps. Passionate about FOSS, I maintain widely used tools and libraries, and have contributed to many large projects including Firefox, Webpack, Rancher, and Mastodon. Outside of work, I'm a practicing Buddhist and music producer.

Skillset

- JavaScript (Node, React, various frameworks and libraries, TypeScript)
- CSS and HTML
- CI/CD (TeamCity, Jenkins, Circle, GitHub Actions)
- Unit and browser testing tools
- Docker, Kubernetes
- Kubernetes
- Telemetry and observability
- AWS
- Linux
- Shell tools
- Git
- Python
- Nginx
- Python
- Vim

Experience

- **Freelance**
  - 2020-Present
    - Freelance Node, Python, React, Docker, and Kubernetes projects.
- **LiLiHi**
  - 2019-2020 · Co-Founder
    - Implemented Kubernetes infrastructure on GCP with Terraform, prototype web application with Next.js, and microservices with Node and Python.
- **Jane.com**
  - 2020 · Senior DevOps Engineer
    - Worked on teams in a DevOps role on testing, Kubernetes administration, cloud native migrations, FOSS tooling and libraries, and hiring. Lead migration to Hashicorp Vault. Designed, implemented, and deployed Node microservices. Lead trainings on change management and incident response. Built standardized templates for libraries, services, and web applications. Lead Datadog migration. Maintained and standardized GitHub organization. Introduced and automated canary deployments.
  - 2018-2019 · Infrastructure Engineer
    - Worked on cloud-native infrastructure team on CI/CD, telemetry, testing, tooling, and Kubernetes migration. Open-sourced internal projects. Lead APM and Infra monitoring projects. Lead integration of a new feature flag platform. introduction of feature flag usage. Introduced policies and procedures around change management, quality control, and incident response.
  - 2016-2018 · Software Engineer
    - Worked on React rewrites of Jane.com and internal apps, and Node microservices and libraries.
- **DevMountain**
  - 2016 · Mentor and Junior Developer on Internal Projects
  - 2015-2016 · Student, MEAN Stack Bootcamp.
- **Freelance Web Developer** — 2015 · Developed Bootstrap-based sites
